The Weaver Gardens Co.

R. 9, WICHITA, KANSAS.

It's Time You Thought of Planting Bulbs, Evergreens, Hardy Perennials, Rhubarb, Asparagus, Winter Onions, Etc.

Bulbs, Shrubs, Hardy Perennials, etc., planted in October or early November, will bring beautiful flowers next April, May and June. Fall planting assures profuse blooming next spring. bring

Cash with order as satisfaction and safe delivery are guaranteed. We give no warranty, express or implied, as to description, quality or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept these terms, they are at once to be returned. TERMS-

BULBS

no other class of Plants are there such unusual possibilities for extreme ction and enjoyment as may be found in spring flowering bulbs. irs are imported Holland bulbs, the best we can buy, and they're ready

HYACINTHS

READY FOR DELIVERY OCTOBER 1st.

Outdoor Culture in Beds or Borders—Bulbs may be planted any time from October until the ground is frozen solid. They succeed in any good garden soil, and while it is more desirable to have a light sandy loam, this is not as essential as having the soil, no matter what its quality, in a spaded and prepared condition and to furnish the proper drainage conditions if planted in a situation where water has a tendency to stand at any time. Plant six to ten inches apart, covering four to five inches if soil is light, but not more than two or three inches if soil is heavy.

Pack a little sand or light soil under and around the bulbs if soil is hard or very heavy. Before severe weather comes on it is necessary to cover the beds with straw, leaves or manure to prevent freezing, the depth of covering varying according to climate, but for ordinary conditions about six inches will be sufficient. This covering should be removed gradually as soon in spring as severe freezing ceases and growth commences.

Culture in Glasses—To grow hyacinths in water select dark colored glass and place bulb so that the base merely touches the water. Set in a cool, dark place until roots have made a good growth, when they may be brought into the light. Give the plants plenty of light and as much fresh air as possible and keep at a temperature of not over 60 degrees until flowers are developed. Fill the glasses with water as fast as it evaporates or change entirely if it becomes impure; a small piece of charcoal put in the water will keep it pure much longer.

TULIPS

READY FOR DELIVERY OCTOBER 1st.

It is difficult to conceive of anything more brilliant in color than a bed of good tulips.

The culture of tulips out of doors is the same as that of hyacinths, except that the bulbs should be planted about three inches deep and three to six inches apart. Tulips are perfectly hardy.

LATE FLOWERING TULIPS

Under this heading are classed the Cottage or May Flowering, the Darwin, and the Breeder.
All are exceptionally desirable for garden decoration and are unsurpassed as a cut flower for vases or baskets.
All late flowering tulips should be planted 4 to 6 inches deep and about 5 inches apart. Good drainage being necessary, an inch or so of sand place beneath the bulbs when planting will be found very desirable to drain off any surplus water. Protect the bulbs with a slight mulch of leaves, removing it as early in spring as growth commences.

COTTAGE OR MAY FLOWERING TULIPS

An excellent class of single late flowering tulips which are specially adapted for planting among shrubbery or in masses in the open border, where if left undisturbed they will often bloom freely for several years. Their long graceful stems and brilliant colors make them exceptionally desirable for cut flowers; many of them are also delightfully fragrant. SPECIAL MIXED. Single late or "Cottage" tulips in splendid

CHINESE SACRED LILY—Narcissus Orientalis

READY FOR DELIVERY OCTOBER 1st.

Culture—Put an inch or two of sand and gravel in the dish which they are to be grown, set the bulbs on this and put enough gravel or shell around them to keep them from falling over; fill the dish with water and set in a dark closet for a few days until the roots start freely; then bring them to the light and keep in any ordinary living room.

Extra large bulbs	.25	2.00	
CROCUS-Mixed, all colors		.25	2.00

PEONIES DOUBLE CHINESE

Peonies will do well in almost any garden soil, but the better enriched the soil, and the more liberal the space allowed for each plant, the more vigorous the growth. In planting the roots cover the crown with two inches of soil. A deep lively loam is preferable and the ground about the plants, as with roses should be worked well. Never place fresh manure close to roots.

BEST NAMED SORTS-		
Festiva Maxima. Very large, fragrant, the best white	.50	4.50
